***El ction/R strictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-30, drawn to a polymer membrane, classified in class 521, subclass 25.
- II. Claims 31-39, and 60, drawn to an electrochemical system, . classified in class 429, subclass 122.
- III. Claims 61-62, drawn to a method of making a polymer membrane, classified in class 521, subclass 27.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a coating membrane for any household object. See MPEP § 806.05(d).

Inventions I and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another process, such as a gas-phase polymerization.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

In the event applicants select the invention of Group II, one of the following patentably distinct species of the claimed invention of Group II must be elected:

Claims 34-36, directed to a fuel cell.

Claims 41-45, and 52-55 directed to a rechargeable battery.

Claims 46-49 and 56-59, directed to a capacitor.

Claim 50, directed to a pseudocapacitor.

Claim 51, directed to a primary (non-rechargeable) battery.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 31-33, 37-40 are generic. Thus, applicant must elect one of the following groups of claims to be examined:

Claims 31-40 (fuel cell)

Claims 31-33, 37-45 and 52-55 (rechargeable battery)

Claims 31-33, 37-40, 46-49, 56-59 (capacitor)

Claims 31-33, 37-40 and 50 (pseudocapacitor)

Claims 31-33, 37-40 and 51 (primary battery)

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1745

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
